Summary	∗ I am a self-taught designer and developer, based in Singapore.
	∗ I believe that great design is timeless, intuitive and aesthetic.
	∗ I have learnt that coding standards and best practices are absolutely critical for the long-term success of any software project.
	∗ I see teamwork, open communication and compassion as the most key values for working together.
	∗ I realised that adaptability, curiosity and humility are the most important qualities to have for succeeding in the tech industry.

Skills	∗ Knowledge of **UX methods** like competitive analysis, task flows, user scenarios, personas and interviewing for the creation and testing of UX deliverables
	∗ Highly proficient in **HTML** and **CSS (with SASS)** for **rapid prototyping** in the browser
	∗ Good knowledge of **jQuery** and **Javascript**, as well as version control using **Git**
	∗ **Familiar with Unix-based server setup (LAMP** stack) for website deployment and very comfortable working in the command line environment
	∗ Skilled in **Adobe Photoshop, Illustrator** and **Sketch** for the creation of web assets

Work Experience

Jewel Paymentech
(Jan 2018 - Present)

I am a **Senior Developer** responsible for the user interfaces and front-end development of Jewel Paymentech's suite of products. My responsibilities include:
- Optimising and refactoring existing codebases to improve the performance of our products, and customer's user experience
- Standardising coding style and improving front-end documentation to facilitate the on-boarding of new team members
- Establishing a style guide for Jewel Paymentech products for a consistent branding and ease of new product development
- Building of prototypes or proof-of-concept systems for explorative research projects
- Working closely with other team members across various disciplines to continually enhance our existing product line and develop new products

Deep Labs Pte Ltd
(Mar 2016 - Apr 2017)

I was a **Front-end engineer** focused on the development of user interfaces and front-end development of web and mobile applications. My responsibilities included:
- Providing input and developing user interfaces for each phase of the application development life cycle, from ideation to design and development till release and support
- Assisting in building prototypes or proof-of-concept systems for explorative research projects
- Working closely with other team members across various disciplines to develop software applications

Nurun Singapore

I was a **Senior developer** responsible for planning and architecting website

(May 2015 - Feb 2016)	implementation projects, as well as management of resources. I focused on all things front-end related, made sure our code base adhered to the latest web standards and was performant and accessible. My scope of work involved: · Working closely with designers, providing direction on the viability of proposed designs · Planning and designing front-end architecture for scalability and maintainability through best practices like appropriate name-spacing and ITCSS methodology · Refactor and resurrect legacy code bases for better future maintainability · Developing bespoke websites for a variety of clients and campaigns · Assessing hardware requirements for optimal server provisioning · Creating custom front-end frameworks for large-scale responsive web projects
Pixel Onion Pte Ltd (Oct 2013 – May 2015)	I was a **Drupal architect** and worked on a variety of projects with several major clients, including DBS bank, Mediacorp and Microsoft as well as the San Francisco International Airport. My main responsibilities and contributions included: · Designing responsive layouts, typography and site components for optimal user experience · Developing responsive custom Drupal themes written in Sass and Susy · Site building, deployment and maintenance using Drupal best practices to ensure scalability and security · Submission of patches and bug fixes to contrib modules · Developing a minimal base-theme to facilitate custom theme development
Aristal Solutions Sdn Bhd (Feb 2012 – Oct 2013)	I was part of the **Project Management Office** on a Core Banking Implementation for a Major Banking Group in Malaysia and my responsibilities included: · Developing the Project Progress Report for weekly Leadership meetings · Managing the overall Program Issue Log to ensure program issues were documented clearly and resolved within the required deadlines · Facilitating the Technical Architecture checkpoint meetings and documenting the issues and action items for follow up Subsequently, I joined the **Testing workstream** and was in charge of: · Consolidating and reporting on key testing metrics (defect retesting progress, retest failure rate analysis, offshore development team patch delivery, UAT exit criteria) · Performing UAT defect trend analysis · Analysing and monitoring the status of key functionalities, highlighting the root causes of failed key functionalities for management attention

Qualifications 2006-2008	**University of Nottingham** · BA (Hons) Finance, Accounting and Management (2:1)

Extracurricular	**Malaysia National Women's Basketball Team** · 2011 - 24th FIBA Asia Basketball Championships (Level II Champions) · 2010 - 7th SEABA Women's Championship (Bronze), 1st BLIA Cup (5th), 3rd Malaysia International Basketball Championship (Silver) · 2009 – 23rd FIBA Asia Basketball Championships (Level II Champions), 31st William Jones Cup (4th)
